---=_linux4898a4f7--Hey Kim,

I use the Mackie 450s. They have a fairly bright sound but a little eq can help that. They are healthy on the bottom end for a 12" but I wouldn't want to put kick and bass through them all night without a sub. Not too heavy and powered adequately. \$650 each last year. They sound better than the JBL Eons to my ear. JBL horns in the Eon series make me cringe.

Tom

Another option in that price range is the Countryman "Choir Mics". They sound really good for the price, and are likely better than the Shure's.

<http://www.countryman.com/store/product.asp?id=56&catid=10>

>Hmmm, high quality, tight budget; I found a pair of Oktava MK-319s with the Mike Joly mods - flat top with premium electronics

http://www.oktavamodshop.com/product_info.php?cPath=2_28&products_id=60 for \$300 for the pair on Craigslist. I haven't put them through their paces yet, but my friend got a pair of MK-219s with the premium mod in the same transaction at the same price and he says he's absolutely floored, they're now his top mics. I'll let you know how mine work out.

kick out pretty darned well; two the SRM 450s drive an R&B band I work with
very nicely for weddings etc, and we use them as monitors on bigger gigs.
We've used a lot of systems over the years, and with these the
weight/power/sound/price ratio is making us very happy.

>The PAs we use in my band meet almost all your criteria. I don't think they are cheap, but our guitarist (and their owner) was a Bose dealer, so he got them at a good price.

I am talking about the Bose L2. These are the heftier versions of the L1 that are mass marketed. I think the L2 are a bit beefier and with a couple of the subwoofer units, we get pretty good sound with these. They are very portable compared to traditional cabs and don't require monitors, which saves money, space and backs.

I think Lou Guarino is using the L1s for his stage setup, and I recall him having good comments about them.

! have funHi Aaron,

It really depends on the PARIS app, but I suspect that the plugins will be spread across all cores, which would be much faster. We'll have to test.

Cheers,

Mike

Here's my latest build. The locking of the C16 UART appears to be complete.
I had missed a bit in the last build.

The next steps will be locking the IF2s, tracking down the intermittent inability
to find the interface on the master card, and locking any further synch queues
that I haven't gotten to yet.

Cheers!

Mike

PS - please test this is you can and let me know how it goes. If you have
a P4, just turn on hyperthreading.
