much<BR>&gt;&gt; money into this experiment if it didn't =  
work=20  
out. In talking to<BR>&gt;&gt; Gary, he wasn't sure if I'd be able =  
to sum=20  
as many channels as<BR>&gt;&gt; I'm running, plus a couple of =  
'verbs, plus=20  
a few channels of<BR>&gt;&gt; dynamics at 88.2k/24-bit with the =  
Project=20  
card. Then I got a<BR>&gt;&gt; lecture about using 88.2k in the =  
first=20  
place... you know - the<BR>&gt;&gt; whole "you can't hear it once =  
you=20  
convert to 44.1 for CD's<BR>&gt;&gt; anyway, and then you also get =  
  
aliasing when you do, and in the<BR>&gt;&gt; meanwhile you're =  
using too=20  
many DSP &a
