aring? You think it might be that VCA "splat"
from certain types of compressors (SSL's are great for this)
flattening out the body tone quite a bit? If that's it - or
part of it - dbx Comps are good at this, too... even the
cheapies.

I assume you've tried all the usual stuff like trying different
mic positions, or even different mics & pres?

Dunno... just having my morning coffee & throwing stuff out
there.
