>Yeah...I get snubbed all the time here.

It's all part of the PARIS Newsgroup Experience.

:~)

Just Joking.

No, but I think sometimes a lot of us know the answers, but are too lazy to answer something we have already answered 100 times so we overlook it and assume someone else will answer the question.  
I might have the record for unanswered questions on here..  
I don't think ill will is intended just the people who got the answers are either too busy or not inclined to answer that day and then it goes into the forgotten pile.

All peoples are welcome here so please stay and participate Yasser.

Brandon

as i have one that no longer has all the connections...it took me many  
looks between that one and the others to see the bad one.

as to the snub thing...we've got too many peeps rep'd here for that to  
be an issue.

> Thanks alot! Is there a way to know for sure that my Aardsync is outputting clock? I fear  
I have been ripped off. I had a New Years gig to record a group live with Paris. I took the Paris and 2 Behringer 8 ch. pre's. I tried running all three entities off of the Aardsync at 44.1.  
My goodness.... snap crackle pop...Soooo I disconnected the Aardsync, and ran the first 8 ch. pre off of the Paris. Well at least those first 8 tracks didn't snap and pop, but of course the 9-16 did, because it was running off of it's own.  
Any ideas guys?  
SteveDetail the connections you used, and how you were connecting to Paris.

David.

They know that if they ignore me for too long, I will find out where they live and come to visit. I did read your post though. I just had no answer
