In deepest respect for your views as a superior and wiser being than
all others, it must be hard to be you. I guess someone has to do it.

Just a thought...

DCI need to hear this!

>A girl asks DeeJ to come over Friday night to meet, and have dinner with her parents. Since this is such a big event, the girl announces to DeeJ that after dinner, she would like to go out and make love for the first time.

DeeJ is ecstatic, but he has never had sex before, so he takes a trip to the pharmacist to get some condoms. He tells the pharmacist it's his first time and the pharmacist helps the boy for about an hour. He tells DeeJ everything there is to know about condoms and sex.

At the register, the pharmacist asks DeeJ how many condoms he'd like to buy, a 3-pack, 10-pack, or family pack. The boy insists on the family pack because he thinks he will be rather busy, it being his first time and all.

That night, DeeJ shows up at the girl's parents house and meets his girlfriend at the door. "Oh, I'm so excited for you to meet my parents, come on in!"
DeeJ goes inside and

Hmm.....gold would either/or/both be:

http://www.soundperformancelab.com/GoldMike/T_UK_STUDIO0SOUND_E.html
<http://www.manleylabs.com/containerpages/goldrefmic99.html>

and purple would definitely be this:

<http://www.purpleaudio.com/Product/MC77.html>

Now you've done it!

;o)I was expecting "With a glass of water, a bedtime story and a kiss on the forehead."

C'mon Rick, you're slipping

:-)

Dimitrios,

I got the test email and one after that with an attachment.
Tom

"Tom Bruhl" <arpeggio@comcast.net> wrote in message =
news:4628edcf@linux...

Thanks Dimitrios,
I have received emails from you recently
Maybe it's my spam blockers. I'll turn them off for a few hours
and see if that changes anything.

This is what you're using right (minus NO SPAM):
arpeggioNOSPAM@comcast.net

I do seem to be more stable with Paris residing in C:\EMU
We'll see about those other fixes next. =20

Do I have to reinstall all my plugins or just move the VST folder
to have it happy at C:\VST Plugins
That will be a task I'm not sure I'm ready for (presets being lost).

Thanks again!
Tom

Hi Tom,
You email continues bouncing back.
I have sent you the Paris exe but it was sent back.
Let me know of a another email address.
Regards,
Dimitrios

I choose Polesoft Lockspam to fight spam, and you?

AFAIK Vista 64 bit will run 32 bit progs very well.

--=20

Martin Harrington

www.lendaneer-sound.com

"DJ" <www.aarrrrggghhh!!!.com> wrote in message news:4629092d@linux...

Cubase ain't 64bit yet, but will be in a few months. I can see the =
writing on the wall and I want to be able to go there, soooo.....

Here's what I'm looking at:

Intel BOXD975XBX2KR LGA 775 Intel 975X ATX Intel Motherbo-\$249.99

http://www.newegg.com/Product/Product.asp?Item=3DN82E1681312_1059

Intel Core 2 Extreme QX6700 Kentsfield 2.66GHz 2 x 4MB L2 Cache LGA =
775 Processor (yeah...that's 10.64 GHz)-\$970.00

http://www.newegg.com/Product/Product.aspx?Item=3DN82E168191_15011

mushkin 2GB (2 x 1GB) 240-Pin DDR2 SDRAM DDR2 800 (PC2 6400) Dual =
Channel Kit Desktop Memory - \$149.99

http://www.newegg.com/Product/Product.aspx?Item=3DN82E168201_46599

XFX PVT73GUGF3 GeForce 7600GT 256MB 128-bit GDDR3 PCI Express x16 =
Video Card-\$119.99

http://www.newegg.com/Product/Product.aspx?Item=3DN82E168141_50185

COOLMAX CP-500T EPS12V 500W Power Supply 115/230 V UL, CSA, -59.99

http://www.newegg.com/Product/Product.aspx?Item=3DN82E168171_59040

Seven Slot PCI Express to PCI-X Expansion System-\$2050.00

=

<http://www.globalspec.com/FeaturedProducts/Detail/GEFanucEmbeddedSystems/>

rough total: \$3599.96

At this point I think I would have a workable 10+ GHZ system that =
might be able to run at 1.5ms without having to worry about ASIO =
direct monitoring while tracking projects that have FX on inserts/sends =
and still be able to utilize my existing PCI audio interfacing with PCIe =
hardware without having to replace it with a mishmash combination of =
PCIe/PCI stuff and I would be 64 bit capable when the time comes and I =
want to go to Vista and run 8G of RAM on the DAW.

I really like the RME HDSP configuration I've got now with the =
Multiface and the 2 x HDSP 9652's with 16 AD/DA's on the ADI8-DS units =
and I don't really want to spend the extra \$\$ on RME and UAD-1 PCIe =
hardware if I can just integrate my existing PCI hardware with the PCIe =
> PCi SBS chassis. There might be a small hit to performance with the =
PCi>PCIe conversion as compared to interfacing PCIe directly with the =
mobo, but the new mobos don't have enough PCIe slots to allow me to use =
the number of cards I want to use without a PCIe expansion chassis =
anyway....and this will need to be 64 bit eventually so there's a \$2k =
expense, no matter how you cut it. So why upgrade PCI cards to PCIe if I =
can get a PCIe chassis that will hold all my PCI cards and allow them to =
interface PCIe anyway?

The reason I'm tempted to make the move now (besides wanting the =
horsepower) is that although the prices of the CPU's will be coming down =
over the next few months, so will the price I'll be able to get for my =
Magma's since they are 32 bit units (although 2 x of them are capable of =
integrating the PCIe host card so this gives them a little added value =
on EBay).

Any thoughts?
