>what james said and did your brother also get one???

Funny you should ask. Actually, I was just speaking to him tonight and, yes,
in fact, he did...

;os ;o)

Cheers,

Kim.Are there any Daws have plugin latency compe

used on many sources that I am familiar with so I am not totally alien to these. As for the Gemini, well, it's certainly Chinese, but it doesn't sound cheap or childish, at least the one I have here...and there is no overly hyped top end to it like I hear with the Studio Projects mics. It isn't a flat mic, but then again, neither is my U87 with the Stephen Paul 3 micron capsule. They both have a presence peak.

You have me very curious now to do a side by side comparison for myself with the Gemini a
