The thing that irks me about autoBush haters is that all they do is bitch. They never take into consideration the circumstances he inherited when he came into office and they never propose any proactive solutions. I find it hard

Jason, are you saying that ALL the black people you know are downtrodden (I mean, apart from the black musicians you know that have achieved financial success)? I must say that most of the black/African-American people I know are not in that realm at all, but are more decidedly middle-class, and a couple are even what you'd consider very successful. I think poverty extends across all races, and it just depends on where you live that determines what percentage of ANY portion of the population happens to be poor.

NeilDitto that. Moved my operation to Seagate these days, no regrets.
