Tom, you may find it useful to print out an excel trouble shooting chart = and check off the items as you tag them good/bad. I find that keeping up = with 'everything' on a deal like this (IE, never enough time to just do = it all in one sitting) is just about impossible. Label each 'part', give = it a proper set of troubleshooting criteria (like say, SCSI cable 1, 2, = 3, 4 or EDS 1,2,3,4 and label each part with gaff tape). If you come up = on a bad MEC, pull all expansion cards and make sure that's not biting = you. Don't forget to mark what expansion came from what slot in what = MEC.=20

Just be methodical man, I know you'll find it.=20

Intermittent success is the best I've got right now.

I plan to install Paris on another comp, try each EDS
individually and ea

ch SCSI cable individually with the 442. =

If

all goes well or not I will have an answer. Next, try the =
same in=20

the actual Paris rig without the Magma. If I can get regular
Paris boots there then it's the Magma power supply
or Magma cable. I'm thinking power supply. I always
had all 5 EDS cards showing even when the hardware
attached to them wasn't.

Does this sound like a logical approach to you?

I'm sick of chasing my tail.

I don't s'pose it could hurt if they're tarnished. My =
experiences though with the issue your seeing have been bad SCSI cables. =

Start small, test every little component, unless you've got =
a bent up input pin somewhere (and I'd light them well and magnifying =
lense them all) I'm having a hard time buying that you have 4 dead =
cables out of the blue though, something caused that if it's the case.=20

Aaron,

Hyperthreading is off. I'll double check though. I'd =
love to save the money
on those scsi cables.

What do you think about Deoxit in the female scsi jacks?

Ya Jeff,
At least half the times no C-16 was attached.
Do you think that a bad C-16 cable could cause these =
issues?
I'll remove them from the setup until all is well.
I know at least a few times it worked that the C-16 =
did also.

Tom,

Stupid question, but did you ever start up without =
any c16's? If so did=20
you see the same issue?

Jeff

I choose Polesoft Lockspam to fight spam, and you?
