sively higher today, when many hold your view of men, than in a time when men decided what we are to be and what our values are. To me, we retain that, while adding in freedom, equality, and self-determination for women and you have a better world.

As soon as some piece of sh*t does something evil and insane, somebody starts talking about testosterone and hardware rather than personal ethics and responsibility. Of course no one talks about estrogen and the need to raise women better when some sicko stabs her newborn 100 times. Nah, we whine about depression... Poor women... bad men!!

Bull

Perhaps we have to damned many crying men and not enough her
