ing on which base unit.
>> There are various options for the units also that range from 1500 to 8k.
>> We just started being dealers for them and Cedar so and I'm still
>> figuring out some of there setups.
>> The software and over all package seems more geared to broadcast and
>> mastering houses. They also do SACD authoring stuff. Probably not what
>> you would want for the composer music producer end of things. Pro
>> Tools, etc are more suited for that.
>
> Unless you crave DSD.

Can I play it on my IPOD?
Can I listen to it on My Space?

:)

If the the composer is using VSTi or using workstation keyboards then I
have my doubts if DSD will make them sound better.

The Midi sequencing in Pyramix is far less than that of PT even so for
most Composers I know of I don't think it will be adequate. Running a
second machine for VSTi then you are at the mercy of this "horrible"

sounding wave file format anyways.

If you were recording the live performance of your orchestral
arrangement done using DSD will possibly make a difference.

It's true! The original members of RTF, Chick, Al, Stanley, and Lenny, are coming to a venue near you.

I haven't been this excited about a concert since I was a teenager!

Check it here: http://www.return2forever.com

I'm taking my 17 and 14 year old musician kids with me as they're playing Portland, OR on June 6th.

AWESOME!

MarkRendezvous with Rama...

One of my top SF books.

Why hasn't this been made into a movie?

They were great.

BTW, I just saw the Moody Blues here in Temecula, if any of
you can get out to any of their shows on this tour, DO it.

They were better last week than when I saw them in 1974.

>>>> the
>>>>>> wars
>>>>>>>> following up, long before someone could write at all.
>I'll only post this in response to your two posts since this topic is not
only off topic, but also unpopular:

Actually the Bible says Romans 3:22-24 "22 This righteousness from God comes
through faith in Jesus Christ to all who believe. There is no difference, 23
for all have sinned and fall short of the glory of God, 24 and are justified
freely by his grace through the redemption that came by Christ Jesus."

Some use "turn or burn" tactics, but I don't agree with that approach. At
the same time, the "do whatever feels right to you" mentality is also
fatally flawed. Between those two is where Jesus taught - we aren't
perfect, and will never be on our own (anyone that disagrees, please attempt
to go a whole day without making a mistake of any kind, whether in action,
how you talk to someone else, or how you think ;-). Only through God's
grace and by his love can be be perfected in Him - not perfect humans, but
loved perfectly (i.e. beyond what we practice and understand in human love)

The point of the above passage, and the idea that we have all sinned is that

we can't receive God's grace and forgiveness, and become "righteous" in His sight by our own power, deeds or merit. It isn't a scare tactic even though it has been used that way.

We have to accept and believe that Jesus, not only loves us, but also took the burden of our own sin upon himself by dying on the cross and being raised from the dead to reunite with His Father - this became the symbol of what "being saved" is all about - allowing old ways to die, and a new life to begin, not just living a good life. This is how the concept of being sinners really becomes a beautiful thing - we aren't doomed to pay for our mistakes forever. There is hope. We also can't keep making the same mistakes without consequences, whether earthly or heavenly (the former is common sense - keep hitting your thumb with a hammer, eventually you'll break it ;-).

In practice the change is real, and the heart does take on a new perspective on our own lives, responsibilities, people around us, etc. We don't stop making mistakes (but that's what forgiveness is for - not excuses, but second chances), and we don't become perfect humans, but now we have hope beyond what the world has to offer.

Happy Easter all,
Dedric

ke Paris, if I delete, I mean delete... don't
make me close the program so I have to clean up all those monster files...
 hopefully someone understands what I mean here... And the plugins that
came with Cubase are... ummm... can you spell TERRIBLE! I tried to adjust
the ones that I played with and I must say... WHAT were they thinking! They
need lessons with plugins from Paris. An example is the chorus... I apply

that to a track and sheesh... why waste my time. I max'd the thing out... not much of a difference. Is there plugins that go from mono to stereo, like in Paris.. or is that just a Paris plugin thingy?

I like the fact that Cubase LE is free with my device... but I am hopeful that there is something else out there that operates similar to Paris... Anyone?the tower of babel wasn't about different languages it's about different ideas of god. we can all agree that a tree is a tree no matter in what language but god and salvation is quite a different animal.

nsive to most Muslims,
esp. extremists. Islam is in many ways more conservative than conservative
Christianity when it comes to controlling/restricting social behavior, strictness
of discipline, and certainly in their belief that society (and all people)
must adhere to that belief, by force if necessary - there is no freedom
of choice in that mindset, only freedom to die. Imho, it isn't a stretch
to say that a non-faith based society isn't going to win points with Bin
Laden's friends by nature, not just action. But on a larger scale, there
is no end to loss of unity, deviation and ever changing rationalization without
a pervading, encompassing morality nudging people in the same direction *with*
regard, respect and caring for one another regardless of other differences.
 And that, in essence, is the crux of the problem on both sides.

>DeejWhat way would you suggest that the savior of humanity come to earth, but as one of us? Maybe even a bit lower and more disreputable than most, (after all, what a story huh?) Someone who lived a real life,

not a cartoon one, and died a real death for the highest cause of all.

And that is the question. What really happened? Answer that and you may pop right out of the matrix...

DC

ps I hear his next visit is going to be much, much more impressive....

------=_NextPart_000_000A_01C88C78.DF52F860--Cool stuff. "Park" almost has a reggae thing
in addition to the cool
doowop and urban vibe. I like it. Make out with your wife music!

I do love you. Romantic stuff. I am pretty unfamiliar with Billy, but
I sure like him. It's like 70's soul without the schmaltz...

Summertime rules! He riffs all over the tune without losing the essence

of it at all. Great stuff.

Look Back and Smile is great too. I love the guitar thing between
verses.

It's all good man, and made me feel much better thanks!

Now check this out. I saw the Moody Blues last week and they kicked butt all over the building. Those guys are in their 60's now and are better than when I saw them in 74. Sooo , I have been in a rut with my guitar playing and I decided to learn a few Moodies tunes.

So far, I have this one down:

http://ca.youtube.com/watch?v=D1dK85I10DM

and this one:

http://ca.youtube.com/watch?v=3XNry6m3Kwo

I have been doing Night in White Satin for years and it still knocks me out. Now if I could just sing like that.

It's been terrific to learn these tunes and I am getting back to my own with more passion.

Anyway, music is the best.

take care
