chrisl@adkproaudio.com HI Robert,

I f I remember correctly it will not fit a full length card like the EDS.

chrisl@adkproaudio.comHi Brandon,

How did you format the drives when you installed windows?
Did you use a 3rd party program to do it?

At last a guy has taken the time to write this all down

Finally , the guys' side of the story.
(I must admit, it's pretty good.)
We always hear " the rules "
From the female side.

Now here are the rules from the male side.
These are our rules!
Please note.. these are all numbered "1"
ON PURPOSE!

1. Men are NOT mind readers.

1. Learn to work the toilet seat.

You're a big girl. If it's up, put it down.

We need it up, you need it down.

You don't hear us complaining about you leaving it down.

1. Sunday sports It's like the full moon

or the changing of the tides.

Let it be.

1. Shopping is NOT a sport.

And no, we are never going to think of it that way.

1. Crying is blackmail.

1. Ask for what you want.

Let us be clear on this one:

Subtle hints do not work!

Strong hints do not work!

Obvious hints do not work!

Just say it!

1. Yes and No are perfectly acceptable answers to almost every question.

1. Come to us with a problem only if you want help solving it. That's what we do.

Sympathy is what your girlfriends are for.

1. A headache that lasts for 17 months is a Problem.

See a doctor.

1. Anything we said 6 months ago is inadmissible in an argument.

In fact, all comments become null and void after 7 Days.

1. If you won't dress like the Victoria 's Secret girls, don't Expect us to act lik

What's that old joke about the parents yelling at the girl because her name
had been written in the snow in pee? In her handwriting? ;-)

Doug (love that image of "terrified insects"...)

<http://www.parisfaqs.com> Chuck, you're a good fellow to offer help, but I don't know...

Basically, my complaints aren't about the newer format(s), but about the
social stuff. The newer format(s) are actually pretty cool.

It's the new corporate control of the site that is the problem. They have
done two nasty things (here comes another list):

1. They are censoring discussions at a frantic rate. Any post deviating even
slightly from accepted protocol is promptly deleted. I recently posted
requesting info on site hits before and after the transition, and it was
immediately deleted. No opportunity for discussion or debate. If some
fresh-faced newbie shows up and starts a new thread identical to one
finished two weeks ago, you can reply with the suggestion to use the
"search" function, but they delete it. I assume because they want more site
hits/advertising dollars. If I was to post right now about my suspicions
that the whole thing has gone to shit because of greed and corporate
bullshit, they would delete it, no matter how politely I phrase it. None of
this would have happened two years ago, not on your life. Never mind if I
suggested that the founder is lying about his being forced to sell the
site....

2. They have, through CNet's clout and marketing dollars, attracted
boatloads of folk who don't know good food from a steaming pile of dog shit.
And they have done so intentionally, of course. Eccentric, well-informed,
discriminating and even picky folk account for a very small portion of the
human population, after all, not nearly enough to pay fat salaries to
corporate big-wigs.

So, a site once defined by a signal-to-noise-ratio of 95% to 5% is now 50/50
