00_0171_01C67489.B2E91880--That's the result I got.. I'm told that Waves got their Idea from the highly regarded SonyOxford Plugin ("TransMod").

I just got my demo pack from Sony to run the Oxfords plugs in PT. I hear from th

click the inputs to their right to route those MIDI =
outputs=20

to those inputs. This works
>fine once I've disconnected =
the=20

USB. The reason I do this is because I need to program =

>synths=20

using an Amiga (soon to go). To get Cubase to play audio to =
these synths=20

I
>have to reconnect the USB but the preset that allows the =
Amiga to=20

edit no longer works!
>Pain in the =
sphincter.
>
>Major=20
