Anyone want a Roland Space Echo? No, not the UAD-1 plugin, but the REAL
DEAL. With a loop of tape and everything!

It sounds great, though I think the tape needs to be replaced soon.

I saw two on ebay recently, one in not good condition for about \$175. One
in great condition went for nearly \$350. I'd say this is in between. Like
I said, it needs a tape, but it's always worked perfectly. The cover isn't
in good shape, as the previous owner thought tha

still free to use across the board. 3.0 is paid for software after a 7 day

trial, and contains PACE antipiracy lock.
Clear things up?
AA

info on it.
<http://www.dspx.com/eqmag.html>
This one has the AES daughterboard.

Both of these cards are running fine in my original Paris computer running Win 95 (the only OS the drivers were developed for). It is based on an ASUS P2BLS mobo. It has a pair of CDR drives and a 2G Seagate Barracuda HD that is about 9 years old but is running fine.
It has a Matrox G450 AGP card and all drivers are configured so all you will need to do is to start the computer, click on the desktop icons for the processors and you've got three really high end FX processors at your disposal.

I need a Paris 8 out card and will either trade this rig for it or I'm asking \$350.00 for it if anyone is interested.

Deej
970-375-7081Dear DJ,
I am Dimitrios.
regarding your offer trade I can trade byou with an output card.
You can either select one with two channells modified with better opa's !
or a stock output.
I don't need any pc cases as it raises shipping costs.
If there is any extra cost involved in shipping let me know too.
Can you have a deal here ?
Regards,
Dimitrios
