>(859) 635-5762I have both of those models, plus the Butterscotch Quail.

While they're all great, I think the Butterscotch has the midrange up front

without being too muddy kind of thing that makes it my go to Cowbell for all my cowbell tracks. Really cuts through the tracks!

>Pure Genius !! got a second D972XBX2KR coming today. Can't wait.I'm not sure what you did last night or what your plans are for tonight but

I thought you'd like to know that B.B. King played live and is playing tonight.

Damn 80 year olds !

<http://tinyurl.com/2ajbttOK>, this is it, I promise.

All the stockings are hung by the chimney with care

All the mics have been ordered or are already here

All the cables are tested, with some even twice

Plus the gear down the line, from computers to mice

But I'm left to wonder, as tracking grows near

If perhaps I'm still missing one key piece of gear

Our sixteen line converters are no better than fair

And I worry they're lacking some detail and air

So I ask you ears golden for some good advice

A stereo converter not naughty but most nice?

For Langevin to Presonus just doesn't seem right

So thanks for the help, I need it all right!

TCBA Mytek AD is a wonder
