(859) 635-5762 I was wondering if anyone might have suggestions as to what the best laptop on the market is today. I have the rare opportunity to get one, with a "sky is the limit" budget. To make a long story short, my wife is going to be laid up for about 6 weeks and requires the use of a laptop to do her work. Once we started talking, we realized that between the both of us, we could put it to good use: her for her business use, and me with remote music possibilities. So we decided to go hog wild and split the cost.

So far, I'm tossing between a HP Pavilion HDX and a Dell XPS M2010. Primarily, we want a 20" laptop with lots of power (both CPU and memory). If Apple made a 20" laptop, I'd be all over it, but what can you do.

Any suggestions? That's so 8th grade, lol

>Guys,

There's no way the Air is going to bomb. Cost is not a barrier to a DINK setup with tons of disposable income. You guys are thinking way way way too techie.

The people that are going to lap this thing up wouldn't even know where to stick a CAT5 cable. All an apple rep will have to do is walk into a starbuck and whip out the Air. Shit, they'll be selling the thing with lattes and a gucci bag before the end of the year, Guaranteed :-)
