nt for live use. They had a couple models out.

Cheers,
-Jamie

> Any recommendations? How old is your system? Is it time to change the battery that's feeding
the
bios alive? Normally, the life of the battery is 4-5 years. If you have some
partition utilities that can start the machine in Dos-mode, you can see if
the boot-partition is lost. As I understand, you have not a Ghost copy that
can save your day if you have trouble with booting. If it's just that the
partition will not start, you can try a repair install with the original
CD, if it's WinXP you're using.

Hope there's something to use here and good luck.

Erling
