gt;>  
>>  
>Hey I'm not riled up, I'm just setting things strait. When I see or hear  
the same old lies like Apple stole the GUI from Xerox PARC I'll set you strait

because it's not true. When People say Apple is just as bad as Microsoft when it comes to ethical business practices, I'll speak up because it's not true also. I've ask for examples of Apple doing the same kind of stuff.

I know Apple has done somethings that I don't care for myself, but you can't say Apple is just as bad as Microsoft.

I always hear something stupid like, somebody wanting to buy movies from the iTunes store to play on their MS Zune ( an MS rip off of the iPod). You can't put a Chevy tailgate on your Ford truck either, so what.

Martin, aren't you the guy that runs Mac OSX on PC hardware? What's wrong with Vista?

By the way you starting to get personal, Martin.
