>Hi Ed -

I wasn't originally looking for responses, I was just throwing out interesting discoveries - but yes, it's invaluable to have less-frequent posters "step forward and be counted". I just did it the way I did because a nose-count was necessary and I reckoned doing it that way would give results I could be fairly confident in. Knowing how many current users there are is of immense use in organizing larger efforts, and the more names we have on that list the more power we have as a community.

As far as it becoming an email list - this was originally just put together from the perspective of doing a community count, s

You can also make a new blank project and import the 2 tracks and process in Paris but it is generally much easier in Sound Forge or Wavelab because

you can make a montage with all the songs on an album, set relative levels of songs and do fades.

johnThat amp should not be breaking up. Are you sure you're not overdriving the Input to it? Crank the amp up full and then slowly turn the output of your POD up to find the point where it breaks up.5 everyday Paris users here in Slavonia-part of Croatia...(in Croatia i think about maybe 20)
