listing some fabulous features from an

>>> audio software whose developers quite obviously are extremely

>>> skilled and super creative equals "starting a war".

>>>

>>> i can just as well describe to you what i like about protools.

>>> protools has playlists, which is hands down the simplest,

>>> most powerful yet most intuitive way of multiple sets of

>>> multitrack recording there is. protools has a very nice automation,

>>> super precise transient detection thats better than

>>> all of the competition, a nice suite of offline processes

>>> and the software, while dull and boring is extremely stable.

>>>

>>> now, would you consider me listing these advantages over

>>> the competition "starting a war" too? probably not. then

>>> answer me this, why would that be different if i listed

>>> stuff like that for samplitude?

>>>

>>>

>>>> well, i have presented you with quite a few factual statements,

>>>> and if your reaction is a mere "i still disagree", well, what else is
