Looks good.

Actually, since the '80s when I built my first guitar rack, I haven't
used any pedals except midi controllers, wah and volume.

Hey, but different strokes, right?

>Suetonius lacked the tools to understand personality defects??? That's like
saying Greek sculptors lacked the ability to understand art because they
couldn't attend RISD. That's insane. Some of the tools we use to analyze
personality were built into us when we were still chimps. And you even Suetonius
wrong as far as his usefulness, there is a great deal in the Twelve Caesars
that is quite obviously historical nonsense, and he clearly cants his opinions
in the direction of some (Octavian, Titus, Vespasian) while emphasizing the
most grotesque of the most ogre-like (Caligula, Nero). What we DO get from
him is some genuine psychological insight as well as a long and considered
discussion on the (very much then current) topic of what kind of leader is
the best one.

Next time I want to read a book about psychopaths I'll check out the one
you linked to. But my understanding is that a mild/minor psychopath is what
we refer to with the less than scientific term of 'asshole' and leave it
at that. And yes, if 4% of the population are psychopaths then there are
12 million of them kicking around the USA. That's a little longer than a
1 in 20 shot, so most of them must stay out of the serial killing/ritual
torturing business.

As for the personality type that is attracted to political power, I still
go to the classics, despite their lack of formal training at modern US universities.

Actually, it very much like saying Greek sculptors lacked the
tools in predict computer art. As with Suetonius, we can do
some rewarding guesswork, of course.

We were never chimps. The chimp line is a dead end with no
connection to humans, despite them being a close DNA match.
To claim so is to advocate a hopeful and orthodox,
but sadly ignorant Darwinism in the face of the fossil record.

Based upon our perspective. But, given our perspective, he
would have described them differently.

Ah, but many would call it other things. Hare's brilliance is opening one's eyes to a systematic look at asshole-ness as pathology. There are other perspectives too, but they involve subjects that atheists find discomfiting. (Hare does not raise moral issues BTW)

Wrong. read Hare.

Well, we agree there.

I've been hard at work (as usual) cooking up more PARIS goodies for 'yall,
and I think I've got a good one this time.

The PARIS DeEsser sounds awesome, and it's easy to use, too.

Thanks so much to everyone who has donated to this. It has been a big help.

I'm currently taking a day a week off work in order to do this (every Monday)
- which is my choice. I love this shit, and I've wanted to do this forever.
 But, it's expensive. It's costing me about $200 a week to make these things
- which is my choice. But, if you do enjoy these plugins and find them useful,
please help me pay for this! I'm seeing dozens and dozens of downloads and
far, far fewer donations.

As always, you can downoad the plugs at my website: www.ensoniq.ca.

Enjoy!

MikeHey Mike! Just wanted to say thanks for your continued hard work and to confirm
that you recieved my donation.

>>Big day. Added another 2GB RAM, put in a gigantic 1TB system drive, and then installed Logic 8 and all of its associated apps and content to my dual G5.

I've done just a few tests with Logic 8 so far but it seems to be working OK. The new single window interface option is very nice. Logical, even. Main Stage is fun.

So I now have 4.5GB of RAM to run various animation, graphics, HD video editing, internet and biz apps, and Logic of course. It's nice to have almost twice as much room for huge projects and multitasking. I still have room to expand the RAM to 8GB if needed but I think this will do for a while.

There's plenty of room on the system drive now for whatever OSX 10.5 needs when it comes out next week, with vast space to spare. (I'll probably wait a bit before I get 10.5 to make sure it's a solid release.)

Ivory got all huffy about the new drive and had to be reregistered. To Synthogy's credit registration was reasonably easy, and there was a 5 day window allowed (sort of, I lost a day of that by installing it right before midnight). But I gotta say, keying software registration to a hardware component that's likely to be replaced seems a bit ridiculous.

Some of the older NI stuff also quit working due to being keyed to the hard drive (sheesh), but the newer NI plugins seem OK. Since I still use some of the older NI plugins I'm going to have to deal with re-authorizing them.

Cheers,
-Jamie

PS. There's already an update for Main Stage available via the Software Update command.This is a multi-part message in MIME format.

Thanks Dimitrios.

Mike said the same thing. Is the ini in the Paris folde or system 32?
Do I want the Master card to be 0 absolutely? I only have one card in there right now and it's all freaky just the same.

Hi Mike,
Well I've been to .cfg many a time.
I've seen that Mastercard setting as being 0
but maybe it changed after removing the 4 other
eds cards for this round of testing.

If it's still 0 what else could this be? Busted mobo?
I'm really in an idunno place right now. I'll be checking
seriously today again because of a session tomorrow morning.

Hi Tom,

If you've only got one card in, then the Mastercard =3D 0 setting is =
right.
The file is Paris.cfg, and it lives in the c:\program files\Emu\PARIS =
PRO
folder.

I'd still check it out to see what it is set to.

If it is wrong, what you are describing will happen.

Good luck!

Mike
