ched the forum, and =

tried

a couple of things there, but no luck. I apologize if I missed the =
answer.

I'm using win 98 SE for PARIS [dual boot machine]. None of my VST =
..dll files

appear in the designated VST folder. So, is this a Win 98 issue?

I have a project coming up soon, where I know Drumagog will really =
help.

Thanks in advance for any help.
