nflymile.com" target="\_blank">Brad@dragonflymile.com

BradCame into this stuff by barter... selling all or in pieces.

(1) MEC blackface \$75

(2) EDS 8-input cards (blueface) \$250 each

(2) C16 (blackface) \$90 each

(1) EDS 1000 \$225

SandySorry..yes. Both gone.

Deej

thanks Will!All,

I am selling my Roland V-drum kit.

You can see the pics here.  
<http://mymixes.zoomshare.com/1.shtml/V-Drums>

I am firmly asking 2k.  
I got it up on V-drums.com and craigslistas well.  
Use the email above to contact me.  
thx  
BrandonCrud....use this email to contact me..

Still need a MEC frame and a 8 input card!- eds 1000 card  
- control 16  
- interface 442  
- interface 2

400 euro with shipping in the EU.Nady ribbon mic is sold.

>Rode NTV-\$450.00 - This is the cardioid LCD that some folks just love and is becoming a bit of a collectors item. Very "tubey/vibey" and 3D sounding with a wankin' big transformer. This is one of those really ballsy, "built like a brick shithouse" mics that Rode made many years ago, right after the came out with the original Classic. They could not sell at a price point (\$1000.00) to compete with the Studio Projects mics. They cheaped out on the successor NTK. I have tried them side by side. The NTK is wimpy and thin sounding/colorless by comparison. There is nothing wimpy and thin sounding about this mic. Very big and "in your face" kinda sound. Reminds me a bit of the SE Gemini with an attitude.

NADY RSM 2 ribbon mic- \$100.00 "Mint" condition with heavy canvas/fabric storage bag. I reinforced the bracket mount on this mic with gasketed washers so that it's now very stable and smooth (all the NADY brackets need this done). This mic is smooth and a bit dark (like a lot of ribbons). I particularly like it on guitar cabs and fiddles.I forgot to add that the foam inside the aluminum flight case of the NTV is a bit cracked in places. I have kept the mic bagged so that there is no residue issue. All the early Rode flight cases seem to have had this problem to a greater or lesser degree. It's not a big issue but deserves mention. Also, the aluminum flight case has a few scuffs. It doesn't look brand new, but it doesn't look like it's been beat up either. Normal wear and tear would be appropriate. The mic itself and all components are in "excellent" (9.999/10) condition
