>nah, it doesn't bug me, i love my digimax'sMike, it seems that you have nailed it with this last
one:-)

Have tested starting Paris a couple of hour without any freezing or
hickups at all with C16 on my AMD Quad-Core Phenom Black Edition 9850
machine with 4 GB RAM in WinXP. It seems that THG Task Assignment
Manager minimized with Paris locked to processor 4 (3 in TAM that's
seeing the first processor as 0.) is working like a champ. I also
tested a little bit with a couple of old project, that seemed to work
normal.

I don't use IFCT at all to get the Scherzo driver use 1 CPU, since it
allways couldn't start Paris that allways showed up with the 1/1
fault.

So it seems the waiting time is over to use Paris with modern double,
triple or quad CPU's. Again thanks Mike, for your work to give Paris
a longer life:-)

Erling
