r />

Yes

Doing the CPU affinity stuff will make it work now on current hardware.

Having Mike fix the drivers will hopefully make so that you don't have to jump thru hopes to make it work.

Pretty much all someone would have to worry about now is whether the new motherboard has PCI slots at all

Currently 2/3 slots, next gen is gonna be 1/2. So using a EDS card plugged directly into a current Mobo will be a 1 or 2 setup at most.

You will need to use a PCI to PCI-e expansion chassis to pull of a more than 2 card system.
