ThanksSo I'm looking to get a new synth in here.Pretty slim synth collection-Kurz PC2X and 2500 rack,D50.I'm looking at the Yamaha motifs,but a buddy was telling me I should go soft synth.I'm not currently running DAW with audio/midi and was thinking of getting into the SX thing.

I haven't gotten into the soft synth thing at all so I'm a little

Havent tried it in Paris but I tried it and using it to capture my Daking
EQ it performed very well. I could not hear the difference between the two,
in fact I actually picked the qclone as being the hardware (it was so close
I was practically guesing though).It will look just like the OnyxVLZpro though. Right down to the
circuit
board layout. ;>)

Tony
